

Traditional Conference Calling Services

Typical Conference Calling Service

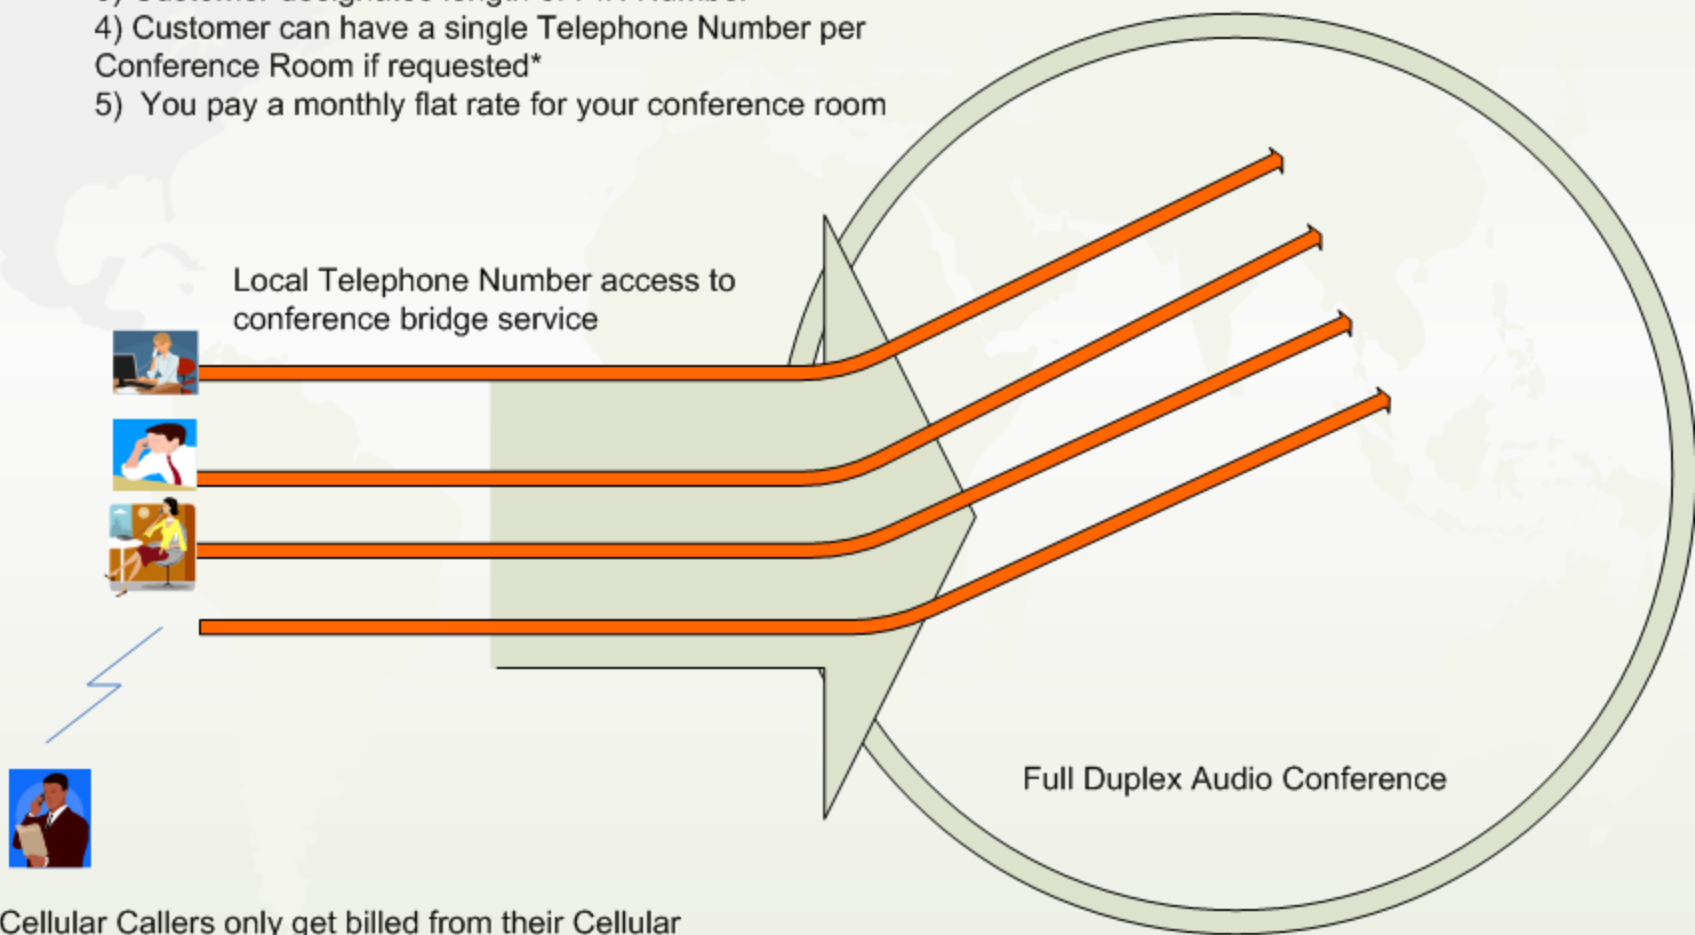

- 1) Requires Dialing in Conference Room Number
- 2) New PIN with each call into the service
- 2) PIN is up to 7 Digits in length
- 3) Multiple Auto Attendant Layers to get into call
- 4) New Telephone number with each call

Cellular Callers get billed twice. First from their Cellular Carrier secondly from their conference bridge provider.

ALC – Flat Rate Conference Calling

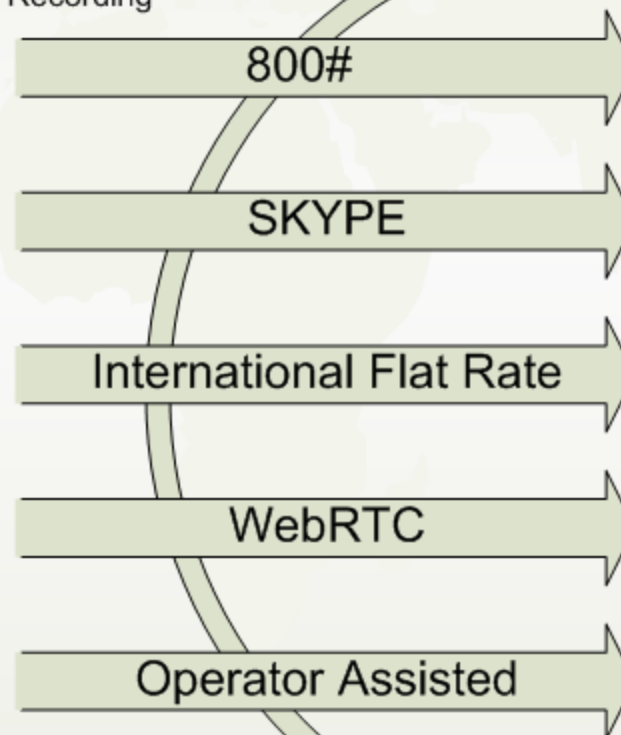

- 1) Local Telephone Number assigned for your conference calls
- 2) Same PIN Number each time, every time, for easy use
- 3) Customer designates length of PIN Number
- 4) Customer can have a single Telephone Number per Conference Room if requested*
- 5) You pay a monthly flat rate for your conference room

Cellular Callers only get billed from their Cellular Carrier for the Bridged Call – no additional charge

ALC – Optional Conference Call Access Methods

- 1) Low Cost 800# Access*
- 2) SKYPE Calls from Overseas*
- 3) Flat Rate International Telephone Numbers available from many countries*
- 4) Future – WebRTC Access*
- 5) Optional Operator Assisted Conference Calls*
- 6) Conference Call Recording*
- 7) Transcription of Conference Call Recording*

Full Duplex Audio Conference
